Workshop seminar 6

Comp201 Software Engineering

Software Engineering Software Design Data Design

Take the document COMP201Hotel RequirementsV2 and use the noun identification technique

to perform an OO analysis and design for the hotel booking system.

Consider the following criteria when judging your design:

1. **Flexibility will this design be good enough to adapt for**
   a. **Multiple hotels and/or hotel owners**
   b. **Different meal bookings**
2. **Inheritance**
   a. **Has inheritance been used to improve the re-usability of the code**
3. **Could you use your design to help build the database tables**
4. **Have you covered all the requirements written in the specification**
